Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 October 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3-7,13,15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Cozine et al. (4,926,947).

Cozine et al. discloses a soil aerator comprising a frame assembly, an aeration device, a front axle (supporting wheel 20), a rear axle member (supporting wheels 18), and a weight transfer system having a biasing member (including members 70 & 66) to transfer a portion of the frame assembly and aeration device's weight as described in col 5. Concerning claims 3 & 15, wheel 20 is considered the roller. Additionally, the axle members are considered the sections of the axle that the rear wheels 18 are coupled to.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8,11,12,20,23,24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cozine et al. (4,926,947).

Art Unit: 3671

Cozine et al. discloses a soil aerator as described previously, but lacks the rear wheels and axles including a separate suspension system.

The examiner takes official Notice that it is known in the art for wheeled implements to include suspension systems. Suspension systems allow the implement to better traverse uneven terrain.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Cozine et al. by using a suspension system with the rear wheels and axles to allow the implement to better traverse uneven terrain such as the ground being aerated.

Cozine et al. further lacks using a planetary gear system, to rotate and translate the plurality of tines each mounted on tine shafts. It would have been obvious to one of ordinary skill in the art at the time the invention was made to a planetary gear system to drive the tines since the examiner takes Official Notice of the equivalence of a belt drive system and planetary gear drive system for their use as a drive system in the art and the selection of any of these known equivalents to drive the tines would be within the level of ordinary skill in the art.

Allowable Subject Matter

Claims 2,9,10,14,21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor Batson whose telephone number is (571) 272-6987. The examiner can normally be reached on Monday through Thursday.
